- 2. The following is an examiner's statement of reasons for allowance: the examiner found no teaching in the prior art that would render obvious the claimed method of identifying an object and an optical apparatus for the optical detection of an object including "determining of location data comprising the steps of: determining direction of the object relative to the optical apparatus, detecting the distance between the optical apparatus and the object, detecting the angle of incline between the optical apparatus and the object, detecting the location of the apparatus, and measuring the altitude of the apparatus; processing location data to determine identification data", claim 11, lines 5-13, "a second measuring device to detect an angle of inclination between the apparatus and the object, a direction detector to detect the direction to the object, a positioning system to detect a location of the apparatus, a third measuring device to detect the altitude of the apparatus, a computer to process location data to determine identification data of the object, wherein the location is selected from the group consisting of: distance, angle of inclination, wireless signals, location of the apparatus, direction, altitude and combination thereof", claim 1.
- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing-delays, should-preferably
